

Pour'n'Play.

Pour'n'Play is the world's leading dual-pour rubber surface system.

Description

The most technically advanced wet pour rubber surfacing system in New Zealand, Pour'n'Play is the ideal choice for playgrounds where safety, durability, and good looks are paramount.

As single or multiple layers, depending on the application, this surface is great for playgrounds, outdoor learning spaces, and multipurpose soft-zones.

-  A porous free draining product
-  Can be any mix of colours
-  Depth can be increased to meet critical fall height
-  Meets safety standards
-  Available for both inside and outside use
-  Sound proofing and insulating abilities
-  Protects against UV and weather extremes
-  Seamless surface, suitable for wheelchairs

Specifications

Product type	TPV rubber granules
Particle size	5mm
Critical fall height (CFH)	Up to 3m when installed with an 80mm poured rubber shock pad
Certification	NZS 5828:2015

Components

100% recycled rubber shockpad with coloured Rosehill TPV top layer.

Recommended Use

Playgrounds, paths and bike tracks, outdoor learning environments, sports courts and wet play areas.

Product Installation

The coarse recycled rubber shock pad base layer is poured on site. The coloured top layer is then poured on top and this melds to the base layer.

Care & Disposal

Maintenance includes basic sweeping of the surface as well as cleaning when necessary with a pressure washer with a mild detergent and cold water. Can be recycled into base layer for sports fields and playgrounds at end of life.

Warranty

5-10 Year product warranty.
